

Under Construction | Science and Faith

1/28/2024

Reflect + Discuss

- If you could ask God anything about the way the universe works, what would you ask?
- Was there anything new, surprising, or interesting that stood out to you from the conversation with Dr. Izabella Szlufarska and Dr. Richard Lindroth? Did it leave you with any questions?
- Read Psalm 19:1-6. How do you see God's creation and the book of nature silently speaking about God and his nature? Which parts of creation speak to you?
- Read Psalm 19:7-9. How is the book of scripture different than the book of nature? How do these work in tandem to speak about God? How do you see these books working together? Are there any ways you see them in conflict?
- Have you ever learned something from science (or another discipline) that conflicted with your faith? Were you able to resolve that conflict?
- Have you ever learned something from the field of science (or another discipline) that strengthened your faith in God?

Pray

- In prayer praise God for his creation. Try to sit in the awe and wonder. Share some 'wow' prayers.

Next Steps

- Check out the [resources page](#) for links to several Bible reading plans and other helpful tools. Explore other opportunities for growth and transformation by checking out [courses](#).
