VISION

At Blackhawk, we desire to see more and more people experience the transforming power of Jesus through our Sunday worship services. When Blackhawk Brader Way was completed in November 2007, we never imagined what we now do on a weekly basis: broadcast our Sunday services online and at multiple sites, leverage the online service as a new “front door,” and hold services in multiple languages. Blackhawk Brader Way’s original technology was not designed for today’s reality. So now, 16 years later, we are responding to what God is doing through our in-person and online worship services by investing in the tools that support our mission of “building a community to reach a community.”

PROJECT DETAILS

Project Tech aims to upgrade the technology infrastructure and broadcast systems at Blackhawk Brader Way, as well as boost safety and security at all three sites, which will support and improve the Sunday worship experience both online and at all in-person locations.

Goals Improve the online experience through enhanced broadcast systems, redesigned broadcast suite, and camera equipment

Update the technology infrastructure and aging audio, video, and lighting equipment at Brader Way to better serve all locations, venues, and online

Upgrade video surveillance at all sites, including BKids classrooms

Invest in solutions for language translation and hearing impairment

Investment \$3 Million

Timeline 12-18 months for design, purchase, and installation. Design began in September 2023.

WE CAN DO THIS!

We desire to see God use our investment in technology to transform hearts and lives. And we need you!

Would you join us by praying for and making a financial investment in Project Tech?

Go to blackhawk.church/project-tech to learn how to:

Step 1: Create an intention. Your intention is the total amount you plan to give to this campaign through December 2024. Knowing your intended gift helps us wisely plan and pace our work. Please make your intention by November 19th.

Step 2: Give anytime. You can give online through a one-time or recurring gift, as well as via check, investments, IRA Qualified Charitable Distribution, and other means.

Thank you for your time, prayerful consideration, and hopeful participation in Project Tech!
